

Counseling, Mental Health, And Social Services For Students

The Board values and believes that it has responsibility to help promote the physical, mental, and social health and welfare of students by providing some services that are outside the regular instructional program. Therefore, the district will either make guidance and counseling, mental health, and social services available to students or, if not available in the schools, make information available to students and their parents or guardians about the agencies or other entities from whom they may be able to obtain such assistance.
